

MULTI-SENSORY WELLNESS DIFFUSER
INTEGRATED SYSTEMS FOR HOLISTIC WELLNESS

An object of desire created to awaken your wellbeing.

POLYSENSORIAL PYRAMID

HYDROVISION

Now available with the new
HyDroVISION JACUZZI

The Hydrovision Pyramid is the first patented Wet & Dry Spa to integrate 10 alternative holistic therapies in 1 product:

1. Aromatherapy
2. Music Therapy
3. Chromotherapy
4. Applied Crystal Therapy
5. Massage Therapy
6. Infrared Therapy
7. Halotherapy
8. Hydrotherapy
9. Video-therapy
10. Pyramid therapy with Applied Orgonometric Therapy

All these therapies have been created and integrated into specific bioresonant sequences by a staff of doctors, luminaries, composers and industry experts in order to make the most of the effectiveness of each of the programs of:

1. Relaxation
2. Sleep
3. Energization
4. Meditation

Via remote control or dedicated smartphone app, the user can select an evocative multisensory experience able to stimulate the senses, meridians and chakras addressed by the various treatments.

The treatment lasts 30 minutes and can be enjoyed alone or with another person (on request). Typically, we recommend 15 minutes of wet spa (hydro-massage) and then 15 minutes of dry spa (massage bed).

MARKET

The main targets are:

1. Home spa (indoor & outdoor e.g. loft, pool-side, garden)
2. Professional spa
3. Wellness & massage centres
4. Corporate wellness
5. High profile hotels
6. Clinics, hospitals & care homes (medical programs currently in development with the hospital of Arezzo)
7. Nautical (yachts & luxury boats on the fly-bridge to replace the traditional Jacuzzi)

Our Wellness Diffuser and holistic wellness systems are patented as an industrial invention and utility model and are realized with the most technologically advanced components in order to integrate various holistic therapies into a single application for

awakening psycho-physical wellness via specific programs designed to improve sleep, relaxation, meditation and energization.

PYRAMID COMPONENTS

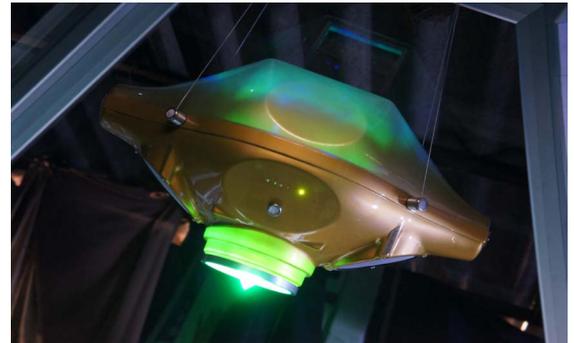

WELLNESS DIFFUSER 5.0 ®

The Wellness Diffuser ®, now available in low voltage version 5.0, designed along with luminaries for each wellness therapy and realized with the most technologically advanced components, is the first patented machine to integrate into a single application specific light frequencies, birefringences across the spectrum of a pure crystal, acoustic bioresonances and sequences of 12 synchronized aromas.

Multisensory emotional childbirth

The Wellness Diffuser is the first holistic medical device used at Arezzo hospital for a multisensory emotional childbirth and postpartum for the well-being of mother and child. At the heart of the system it provides:

- Chromotherapy
- Aromatherapy
- Music therapy
- Applied crystal therapy

Wellness Diffuser 5.0

PYRAMID COMPONENTS

MULTISENSORY OASIS

The Multisensory Oasis integrates the Wellness Diffuser 5.0 with an innovative infrared massage bed with 9 specific therapeutic programs and 5 wellness programs to match the Master Sequences of the DB 5.0. Thanks to this powerful combination, you can now add touch to the other senses without the need for an operator. You can adjust the intensity of the massage on the various Chakras and also the duration of treatment and customize the programs themselves with an extremely simple to use remote control. Today the two technologies come together in holistic synthesis as the Multisensory Wellness Oasis®.

Infrared Massage Bed

HYDROVISION PYRAMID ® (HVJ)

The Hydrovision Pyramid ® is the perfect spa for luxury homes, penthouses, suites and high profile wellness centres and for those in search of wellness of mind and body.

Available from today, the new top of the range Hydrovision is an innovative hydro-massage spa Jacuzzi concept of our Hydrovision Pyramid Master Craftsmen.

Ideal for any situation at home, outdoors (in the garden, pool-side, penthouse, etc.), for boats and hotels (suites and spa facilities), the new HVJ is the most comprehensive holistic centre, patented and implemented to achieve the very first “all in one” wet and dry spa.

After a long period of research and development in design, electronics and new materials, the new Pyramid HVJ is the most exclusive model for our most demanding customers.

Of limited release and tailor-made, each HVJ Pyramid is built from individually numbered pieces certified by experts along our chain of production, designers and craftsmen who express the most exclusive essence of “Made in Italy”.

The development of each individual mechanical, electronic and design component has been aimed at delivering an entirely new and complete experience in a comprehensive module that will stimulate your senses with a surprising holistic effectiveness.

In addition to its low voltage standards, the HVJ model comes with dedicated servicing and training to guide you through a better understanding of the bio-vibrational effectiveness of the total experience.

The therapeutic sequences used also for medical purposes are but one aspect of a further guarantee of our product.

For optimal use of the Hydrovision Pyramid our psychologists and coaches can train wellness operators and end users with a short but complete preparatory course.

Hydrovision Jacuzzi

CUSTOMIZATION OF THE PYRAMID

Our way of interpreting holistic wellness has led to the advanced customization of our systems.

We believe that providing unique systems on the one hand means further enhancing our product range and on the other offering each customer the opportunity to work with our engineers and product developers to evaluate all possible improvements and customize them specifically in each of the following areas:

DESIGN

Our systems have received several awards for their design, including the Design+ and “Un Designer Per Imprese” [A Designer for Companies] prizes, in particular for our concept at the Milan Triennale.

Thanks to coordinated collaboration with Material ConneXion Italy Srl, a company operating in the field of design with innovative materials and specially selected by the Chamber of Commerce of Milan, we also benefit from the expert consultancy offered by Milanese university faculties and schools of higher education and design who are involved in the project and coordinate the work of young designers, among whom those of Domus Academy, IED - European Institute of Design, NABA - New Academy of Fine Arts and the School of Design at the Polytechnic of Milan, in customization and development of mock-ups, models, renderings and ad-hoc environments.

TECHNOLOGY

For the Wellness Oasis, by partnering with various electronic engineering and medical companies, we are capable of designing, realizing and implementing high-tech products for our massage and infrared systems, hydro-massage components and mechanisms for easy and quick conversion from wet spa to dry spa.

ELECTRONICS

As for electronics and safety systems, we can guarantee the broadest compatibility for each specific need for control and usability, by interface with a complete range of wireless, Bluetooth and infrared devices.

MATERIALS

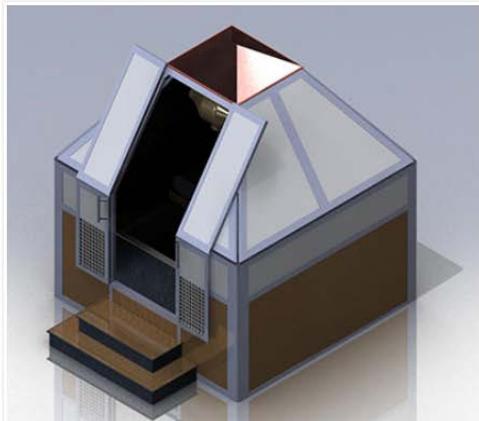

Our collaboration with Material ConneXion Italy Srl allows us to individuate the latest and most innovative materials in the world, which, in addition to being aesthetically pleasing, can guarantee the best in quality, chemical and physical appearance for all therapies.

APPLICATIONS

Development of a smartphone app for Android and iOS allows customers full customization and management of all the devices and facilities, offering a customized graphical interface and a set of functions for customizing or recalling specific programs with a single command, or handling the specific requirements or preferences of users.

ACCESSORIES AND COMPLEMENTARY DEVICES

As a final step you can also integrate our systems with other systems including air conditioning, ventilation, dehumidification, new devices and accessories in order to maximize the level of customization of your Luxury Hydrovision Home SPA. All this makes each and every one of our wellness systems even more unique.

AWARDS

Certified by Executive Determination no. 767/2013 of 03/07/13, we won the competition of “Un Designer per le Imprese” [A Designer for Companies], sponsored by the Chamber of Commerce of Milan, the Provinces of Milan, Monza and Brianza and Material ConneXion Italy.

Our new model, Vers. 6.0, also earned recognition in July 2012 from Design+, sponsored by the Permanent Exhibition of “Made in Italy” and Italian Design in the World, with special mention for the functionality and innovation of the product and for bringing value to Italian Design.

Certified by Determination 21573 of 21/11/14, Invitalia, the National Agency for inward investment promotion and enterprise development, which is mandated by the Ministry of Economic Development, completed a qualitative analysis of the merits of the Hydrovision project leading to the award for “Misura Brevetti+” for the economic fruition of the patents of innovative Italian micro, small and medium enterprises.

AN EXCLUSIVE SPA AT HOME

We are specialists in the design of home spas: with us you can create your own custom spa at home.

Don't deny yourself the affordable luxury of a unique holistic home spa! We increasingly hear of home spas; wellness spaces, places for relaxation and regeneration. In an ever more hectic society that leaves less and less space for meditation and introspection we feel the overbearing need to construct a space where we can get away from it all. These spaces for wellness and relaxation were, until recently, considered a luxury for the few, but today are increasingly in demand, and that is why we specialize in the design of home spas.

HOME SPA DESIGN

We think of the home as a space in which it is possible to regenerate psychically and physically.

For us, the home is a place of relaxation and wellbeing.

We conceive and design wellness spaces and environments that allow you to find refuge from the stress of modern life in your own home.

Our wellness modules can be situated in a bathroom or other dedicated home space to realize a customized spa which stimulates well-being through positive feelings and emotions, holistically combining multiple emotional therapies.

ENVIRONMENTS

OUTDOORS & MARINE

A SPA IN THE GARDEN, BESIDE THE POOL, OUTDOORS, ON ROOFTOPS OR PENTHOUSE TERRACES

A SPA IN THE GARDEN: INNOVATIVE SOLUTIONS TO REALIZE YOUR GARDEN OR OUTDOOR SPA

Often the garden is an oasis for retreating from the stress of everyday life and the pool a meeting place for pleasant moments of conviviality, events and occasions to share with friends and acquaintances by day or on hot summer nights.

A spa area can also be realized in a garden, with the pleasant sound of water among wild vegetation of a small private space to live in summer and winter, outdoors or in a small sheltered environment.

A SPA BESIDE THE POOL, ON THE ROOFTOP, PENTHOUSE OR LUXURY TERRACE

In terms of outdoor spa settings and pool, a typical location for our modules is in luxury attics and penthouses, to increase the value of your property and offer exclusive wellness for you, your family and friends all year round.

Our spa module for penthouse rooftops with its advanced Hydrovision technology can be integrated with other modules (e.g. Turkish bath, sauna) to ensure protection and usability in both summer and winter with a quality covering.

A SPA IN YOUR LUXURY ATTIC

Another classic setting for the Hydrovision module is the rooftop. With the Hydrovision Pyramid, you can create a rooftop spa by customizing the module according to the needs of space, thus optimizing the environment for the creation of a professional or private spa and wellness centre.

HYDROVISION FOR MARINE APPLICATIONS

Following the rust-proof certification of our Version 5.0 Wellness Diffuser for nautical use, our designers have prepared innovative fixings to install our Hydrovision model on the fly-bridge of boats of over 30 metres, in place of common Jacuzzis or mini pools.

OUR GREEN HYDROVISION SPA: THE TECHNOLOGICALLY ADVANCED SOLUTION FOR YOUR OUTDOOR SPA

Our modules and integrated systems allow maximum relaxation outdoors both in the warmest and coldest months, with the ability to heat the water and exploit a microclimate provided by an innovative system of progressive air-conditioning, without requiring special maintenance, since, unlike most indoor Jacuzzis, our modules have a filter pump that can recycle water for long periods without having to change it after every use.

CHARACTERISTICS OF THE PYRAMID

The external structure is made of aluminium, with a slip-proof base made with granular sand from the Valley of Giza and the covering is available in optional opal, marble or mirrored glass.

Egyptian scholars gradually realized that energy was concentrated at a point corresponding to the centre of the pyramid at Giza, roughly in the same position as the King's chamber.

Many tried to recreate the same situation but experiments did not always give satisfactory results. A conclusion was reached that it was the most successful experiments used the same shape and scale dimensions as the original pyramid of Khufu at Giza.

Currently, the same kind of energetic pyramid is used for Reiki treatments, crystal therapy, meditation and massage in order to amplify the physical-energetic effect of pyramid therapy.

Our multisensory pyramid reproduces in scale Khufu's original pyramid, where energy

is concentrated at a point corresponding to the center of the pyramid, roughly in the same position as the King's chamber.

All our energetic pyramids are tailor-made to your wishes, and can be shipped disassembled on request, or you can ask for an on-site turnkey installation.

The multisensory pyramid has an aluminum dome that forms a W. Reich orgone accumulator while respecting the golden ratio of the Pyramid of Khufu, with head height one third from the top, the point at which, in the Egyptian pyramids, the "bath of purification" was placed.

CERTIFICATIONS

Main components: Diffuser 5.0, Hydro-massage bath, Infrared Massager bed, sliding Wet / Dry Spa mechanism and control via proprietary APP (iOS and Android).

All products are certified and in accordance with EC regulations, in particular certified by:

- a) Directive 89/336
- b) Directive 73/23
- c) 98/37/EC low voltage directive

The product can thus be considered:

- a) a lighting fixture as certified for all the LED lighting (EN 60598-1 and EN 825).
- b) a domestic electrical appliance for the heating part (EN 60335-2-101: 2002).

The diffuser also conforms to regulations under Directive 2002/95/EC, also known as RoHS, which prohibits or limits the use of lead, mercury, cadmium, hexavalent chromium and hazardous substances. In particular concerning the content of mercury in fluorescent lamps and neon, the product is already certified to RoHS standards.

As regards lead content, in particular relating to high temperature solder points, it is less than 85% as per regulations.

Among the other EU directives, the WEEE regulations on waste electrical and electronic equipment are respected by all components of the diffuser being in accordance with criteria regarding the collection, handling and recycling of waste electrical and electronic equipment.

The covering parts are also environmentally friendly, recyclable and made of Class 1 materials; thus they have the highest level of safety possible in terms of materials used, which are self-extinguishing. Also, in the case of combustion the materials do not emit harmful gases.

Our technology has been installed in various facilities: Hospitals, Spas, Gyms, Hotels, Corporate Premises and Outdoors.

DIMENSIONS

For logistics and international shipping reasons we have created an all-in case that includes all the components of the pyramid measuring 130 x 230 x 150 (h), with the hydro-massage components shipped separately.

The AUREA version of our pyramids has the following interior measurements: 230 x 230 x 240 (150 h pyramid + 90 base). Ventilation conforms to Law 626 concerning hygiene in the workplace. **The Hydrovision version** measures 230 x 230 x 300.

Installation is performed by our accredited installers, electricians and own staff, providing full installation and testing as well as comprehensive instruction in use of the product and explanation of specific know-how to end-users or holistic practitioners.

We can also train operators and end-users through specific training courses and updates given by our experts.

In any case, a full and comprehensive manual is available, which explains the operation of all components and also how best to make use of them.

SPECIFICATIONS

Certifications, specifications & safety standards:

The product has been certified conforming to:

- Directive 89/336
- Directive 73/23
- 98/37/EC low voltage directive.

The reference standard for devices in bathrooms is CEI 64-8 / 7 (attached to regulation on "lifesaving" devices). Avoid mounting the diffuser in environments with the following characteristics:

1. Relative humidity greater than 85%.
2. Strong vibrations or shocks.
3. Exposure to jets or infiltrations of water.
4. Exposure to aggressive and pollutant environments (e.g. sulfur and ammonia gases, saline mist, smoke) in order to avoid corrosion.
5. Other magnetic interference and radio frequencies (e.g. avoiding installation near transmitting antennae) that would impair infrared transmission.
6. Exposure of the controls to direct sunlight and atmospheric agents in general and in any case to temperatures greater than 35°C.

Voltage-Frequency rating: 220-240VAC, 50-60Hz

Total power rating: 140W

Current consumption: <1A

Power supply: power cable

Degree of protection (IP): IP 4X

Insulation class: II for the low voltage part

Ambient temperature: 10-35°C Minimum distance from light source: 1.2m

Type of installation:

built wall ceiling suspended ground table

Binary post

(supplied with unit)

(not supplied with unit – see instruction sheet)

Inside operation:

suitable

not suitable

Can be installed on:

parts with normal flammability

insulated ceiling s (only for casings)

flame retardant / non-combustible parts

ENERGY CONSUMPTION

All the wellness diffusers are produced under licence from NPS Srl with a unique serial number. The name of the product along with the serial number is reported on the side of its casing.

Hydrovision Luxury Energy consumption
